**Subject:** Special Closure Areas

Dear Commissioners, Blue Ribbon Task Force, Regional Stakeholder Group, and Science Advisory Team,

I am writing to express support for the use of special closure areas to reduce disturbance to wildlife on behalf of PRBO Conservation Science. We believe a reduction in disturbance will benefit wildlife in the region - improving their health, safety and reproductive success. We also support maintaining access to Fisherman's Bay and East Landing at South East Farallon Island for public safety, education, and ecotourism activities.

Sincerely,  
Jennifer Martin
